

Retrofit VECTRON[®] for Old Switchboard Meters

- **Cost-effective solution for old metering**
- **Easy installation, No rewiring or de-energizing**
- **Replaces old Switchboard meters with VECTRON**

DESCRIPTION

This new Retrofit Panel Adapter allows the user to replace an old switchboard meter (Westinghouse, GE, Schlumberger, PSI, Transdata...) with a new VECTRON socket meter. This replacement can be done in minutes without de-energizing the circuit or rewiring anything. Simply open the test switches or remove the paddles, remove the old cradle (meter) and plug in the Retrofit VECTRON. Easy installation translates into lower labor costs which in turn makes the meter upgrade feasible for many applications.

With this retrofit package you can cost effectively offer your customer the newest metering technology without shutting down their circuit or being concerned about miswiring. No more concerns about how to handle the asbestos wiring. Don't handle it at all. Once this Retrofit has been installed, the customer will have a benefit of a standard socket interface for any future meter testing or upgrades. Many utilities have already standardized on socket meters, taking advantage of lower costs and simplified maintenance. Using socket meters eliminates the need to stock or maintain more than one type of metering package. Also, they will not have to pay for the higher priced switchboard metering anymore.

This series on Retrofit Adapters is the newest addition to the comprehensive Panel Adapter Family, which includes the Flush Mount and Surface Mount Adapters as well as a number of options.

A variety of meter cases and forms are available. The VECTRON meter is sold separately, contact Schlumberger.

ADVANTAGES (Retrofit Installations)

- ▶ Retrofit Adapter can also work with any standard socket meter.
- ▶ Lower initial and replacement costs.
- ▶ Less expensive solution than using switchboard meters.
- ▶ Ability to mount a lower cost industrial meter on a panel.
- ▶ Reduces meter and spare part inventory.
- ▶ Simplifies maintenance, testing and replacement.
- ▶ Flexible - change meter or manufacturer any time.
- ▶ In stock models available for immediate delivery.
